Pain is usually temporary, but in chronic pain syndrome (CPS), it's long-term, and life-altering. Learn what causes CPS and how to relieve it.

Chronic Pain Syndrome: Symptoms, Causes, Diagnosis, Treatment

Complex regional pain syndrome (CRPS) is a chronic (lasting greater than six months) pain condition that most often affects one limb (arm, leg, hand, or foot) usually after an injury. CRPS is believed to be caused by damage to, or malfunction of, the peripheral and central nervous systems.

Complex Regional Pain Syndrome Fact Sheet | National ...

Complex regional pain syndrome (CRPS), also known as reflex sympathetic dystrophy (RSD), describes an array of painful conditions that are characterized by a continuing (spontaneous and/or evoked) regional pain that is seemingly disproportionate in time or degree to the usual course of any known trauma or other lesion. Usually starting in a limb, it manifests as extreme pain, swelling, limited ...
