The Electric Blue Johanni *Melanochromis johannii* (previously *Pseudotropheus johannii*) is a real beauty that offers pizzazz to the African cichlid aquarium. The coloring of both the male and female is very appealing, and they almost look like two separate species. The male has a brilliant blue body with darker blue striping, but the dark colors "bleed" onto the lighter blue creating a ...

The infection caused by *I. multifiliis* is referred to as "ich" or "white spot disease." *I. multifiliis* is an obligate pathogen that cannot survive without the presence of living fish. All fish are susceptible, and a similar appearing parasite, *Cryptocaryon irritans*, is seen in marine species. *I. multifiliis* is readily transmitted horizontally via direct exposure to infected fish or via ...

Parasitic Diseases of Fish - Veterinary Manual

Frustrated by the lack of resources for fish owners looking to take better care of their fish. The staff at our local pet store have been incredibly helpful, but they don't know everything either. A few months ago I took a fish in, because I wasn't sure what was wrong and they had no idea either.

11 Reasons Why Your Fish Keep Dying - FishLab

Each fish also occupies a certain amount of space in an Aquarium, with the larger fish (obviously) taking up more space. Accordingly, Aquariums are also available in four sizes, with the smallest holding only a single small-sized fish, and the largest being able to accommodate 4 total fish.

Cichlids / ' s i k l i d z / are fish from the family Cichlidae in the order Cichliformes. Cichlids were traditionally classed in a suborder, the Labroidei, along with the wrasses (), in the order Perciformes, but molecular studies have contradicted this grouping. The closest living relative of cichlids is probably the convict blenny, and both families are classified in the 5th edition of ...
