Microsoft Excel 2019: Formulas and Functions

A common way of creating formulas in Excel involves entering the formula data into worksheet cells and then using the cell references for the data in the formula, instead of the data itself. The main advantage of this approach is that if later it becomes necessary to change the data, it is a simple matter of replacing the data in the cells rather than rewriting the formula.

Microsoft Excel Basic Tutorial for Beginners

Optional: Download our practice workbook.. Goal Seek. Whenever you create a formula or function in Excel, you put various parts together to calculate a result. Goal Seek works in the opposite way: It lets you start with the desired result, and it calculates the input value that will give you that result. We'll use a few examples to show how to use Goal Seek.
