Introducing IntegraLine Fiberglass Pipe - FRP (Fiberglass Reinforced Plastic) Pipe. After years of serving corrosion-related industries, Fibrex noticed there seemed to be no easy approach to selecting and designing fiberglass reinforced plastic (FRP) pipe (also known as GRP pipes). Most plants have worked with fabricators and engineers to custom design all fiberglass pipe (FRP) equipment.

- The FRP signal to the ECM is one of the signals used to command the correct injection timing.
- The primary function of the FRP sensor is to provide a feedback signal to the ECM indicating the pressure of the fuel in the fuel rail.
- This sensor is replaceable.
- The ECM monitors FRP as the engine is operating to modulate the PCV.

Manhole closings are protected by a grating or manhole cover, a flat plug designed to prevent accidental or unauthorized access to the manhole. These covers are traditionally made of metal, but may be constructed from precast concrete, glass reinforced plastic or other composite materials (especially where cover theft is of concern). Because of legislation restricting acceptable manual handling ...

Piping or tubing is usually inserted into fittings to make connections. Connectors are assigned a gender, abbreviated M or F. An example of this is a "3/4-inch female adapter NPT", which would have a corresponding male connection of the same size and thread standard (in this case also NPT). Common piping and plumbing fittings. This section discusses fittings primarily used in pressurized ...
