The book is different from most LEGO books I can think of in that it tells a fictional story, starting from the US space program in the 1960s (Neil Armstrong's footprint on the moon on p.7 is particularly nice) through to the distant future. It uses photographs of LEGO to illustrate this science fiction, as well as 3d renderings of the step ...

LEGO Space: Building the Future Available from No Starch Press. The book is a science fiction tale of human exploration of the solar system and then (inevitably) run-ins with evil masterminds and alien life forms. It begins auspiciously enough with a brief treatment of the space exploration history that we know so well.
