New Best Practices for Power Project Planning and Construction

Over the past decade, the process of designing and constructing nuclear and fossil-fueled power plants has become increasingly complex. Prior to 1970, Bechtel San Francisco's power division rarely used a project manager when implementing its power-

Management for power
plants is an essential
part of any capital
improvement project,
big or small. NAES
understands that
owners and executives
of power plants do not
have the time or
energy to spend
finding contractors,
designing plans, or
overseeing
construction.

necessary work like welding and inspection can be done without additional temporary structures. It also pays to think about how to replace heating surfaces and wall tubes (Advances in power station construction, 1986). It is necessary to think about the safety of people working inside a boiler; e.g., how to make necessary scaffolding and how to minimize
