Neurotransmitters are endogenous chemical messengers that transmit signals across a chemical synapse, from one neuron to another “target” neuron, muscle cell, or gland cell. 2 Some neurotransmitters are excitatory, facilitating

Read Free Primary Neurotransmitters Manual Guide

transmission of messages, while others are inhibitory neurotransmitters, impeding transmission. 2 These chemical messages are critical in the modulation of pain.

The Neuroscience of Pain

A neurotransmitter is a chemical messenger that carries, boosts, and balances signals between neurons (also known as nerve cells)
