Orion SSAG VS Starlight Xpress CoStar or other - posted in CCD/CMOS Astro Camera Imaging & Processing: Okay guys and gals I have a question for you. I have been using a Meade DSI Pro for autoguiding and I have decided to switch to a dedicated autoguider. I am looking at spending no more than \$300 dollars on this. So I would like your input on the Starlight Xpress CoStar CMOS autoguider and the ...

Orion SSAG VS Starlight Xpress CoStar or other - CCD/CMOS ...

The Starlight Xpress Lodestar X2 Autoguider is a popular guide camera for deep-sky astrophotography. In fact, the original Lodestar was considered to be the best autoguider on the market for a long time. The X2 version is the successor to the original Starlight Xpress Lodestar autoguider and uses a Sony ICX829 Exview sensor.

Using a Starlight Xpress Lodestar X2 Autoguider for ...

The Starlight Xpress CoStar stand-alone Autoguider is a sensitive USB-2 powered guide camera featuring a mono CMOS sensor with 1304x1024 pixels and opto-isolated control outputs. As small as a 1.25" eyepiece but considerably lighter! Also makes an effective Lunar/Planetary camera.

Starlight Xpress CoStar CMOS Autoguider | Ikarus Imaging

The Starlight Xpress CoStar is a dual purpose camera that works well for guiding and planetary imaging. The CoStar is a monochromatic guider featuring a 1304 x 1024 array of small 5.2 micron pixels. These smaller pixels will yield better planetary resolution at the expense of some sensitivity for guiding.

Starlight Xpress CoStar Autoguider - Skies Unlimited

Terry Platt of Starlight Xpress is aware of the effort, and has provided me with some missing bits of developer documentation. He also provided me with a Lodestar camera to facilitate its testing. Please do not make them regret providing developer documentation by asking questions or

complaining about problems with this driver to SX.
