Untangling The Web What Internet

Untangling the Web is a timely and detailed account of how the internet is changing us, and what we can do about it. The book makes very good points about the different identities we have online, and also about the way things are changing as the anonymity of the early days of the web gets eroded, and past identities become harder to erase.

Berners-Lee did not invent the internet. Rather, he invented the web. Very broadly, the former is the physical stuff - from your PC to the cable in the street to server farms and cloud storage. The web is made up of webpages and websites that are written in HTML (hypertext mark-up language) which he created.
