Instead of specifying individual tolerances the tolerance classes according to this standard may be used. General tolerances for linear and angular dimensions and for shape and position as specified in this standard apply for weldments, welding assemblies and welded structures etc. Special provisions may be necessary for complex structures.

In other words: ISO 13920 codifies exactly what happened before ISO 13920 existed. Basically "Line 'er up as best you can and weld the sucker" So in effect specifying "Tolerances per ISO 13920" is functionally the same as specifying no tolerances at all. It just makes you feel good because "I called out a standard."
